

TRADE-IN 600MHz ON YOUR TERMS THROUGH 7/2020

The FCC has reallocated the 600 MHz frequency band (614 – 698 MHz) for wireless broadband use. With this reallocation, wireless microphone systems will eventually be prohibited from operating in the 600 MHz band.

If you're currently operating a 600 MHz wireless system, you will need to transition to a new system anytime from now until July 13, 2020, depending on where you are operating your wireless system. Audio-Technica is offering a trade in program to help you make the switch out of 600 MHz. For each 600 MHz wireless system you trade in (regardless of manufacturer) you'll receive a rebate on an eligible Audio-Technica wireless system.

Now extended through July 13, 2020.

How To Trade In Your 600 MHz System:

1. Verify that your trade-in system operates in the 600 MHz band. Your receiver and/or transmitter should include a sticker with the frequency range. If any part of the listed frequency range falls within the 614 – 698 MHz range, your system will eventually be prohibited from operating and is acceptable for trade in.
2. Purchase a new eligible Audio-Technica wireless system from an authorized Audio-Technica dealer in the U.S. and its territories between **8/15/2017 and 7/13/2020**.
 - 2000 Series (single channel): \$50 trade-in rebate
 - 3000 Series—4th Gen (single channel): \$75 trade-in rebate
 - 5000 Series—3rd Gen (dual channel receiver): \$500 trade-in rebate
 - System 10 Stack-Mount (single channel): \$50 trade-in rebate
